

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## Preface.

### THE FRANKS COLLECTION.

THE immense collection of British and American Book-plates (Ex-Libris) formed during the last twenty years of his life by that famous antiquary, Sir Augustus Wollaston Franks, K.C.B., F.R.S., P.S.A., Litt.D., the late Keeper of British and Mediæval Antiquities in the British Museum, had its origin in his friendship with the Hon. John Leicester Warren (afterwards Lord De Tabley), whose well-known "Guide to the Study of Book-plates" is said to have first inspired Sir Wollaston with the zeal and enthusiasm which he afterwards threw into the pursuit and study of Ex-Libris. He soon outstripped all his contemporaries both in the extent and importance of his acquisitions, chief among which may be reckoned several private collections (including that of Lord De Tabley himself), which he secured *en bloc*. He thus obtained many duplicate examples of even very rare plates, so that apart from the magnificent collection of upwards of 34,000 different plates which is now, in accordance with the terms of his will, preserved in the British Museum (Dept. of Prints and Drawings), there remains a vast surplus of valuable plates not required for the National Library. This duplicate collection, perhaps second in extent and importance only to its original, has been purchased by us direct from the residuary legatee, and is now catalogued and offered for sale at the prices affixed. The arrangement follows the lines of the monumental "Catalogue of the Franks Collection in the B.M.," prepared by Mr. E. R. J. Gambier Howe, F.S.A., which has been recently published by the Trustees, in three volumes, royal 8vo, and the classification of "styles" adopted in that work has also been generally followed. A few notes and references to reproductions of plates in well-known works have been occasionally added. A large number of comparatively less important plates (chiefly plain armorials of the 18th and 19th centuries), remain uncatalogued, but enquiries for any particular examples that may be desired will be carefully looked up and the plates can very probably be supplied. It should be added that most of the plates bear on the back the stamps "B A M" and "Dupl."

# ELLIS'S

## CATALOGUE OF BOOKPLATES

(*Franks Collection*),

29, NEW BOND STREET, LONDON, W.
